

Help keep **Fats, Oils & Grease** from clogging the sewer pipes!

EN-CR 3/10

Follow These Steps To Help Prevent Clogged Pipes And Sewer Back Ups:

Slijedite ove korake kako biste spriječili začepljanje cijevi i povrat kanalizacije

1

Put cooled fats, oils and grease into a covered, disposable container and throw it into your garbage.

Odložite ohlađenu masnoću, ulja i masti u zatvoren jednokratni kontejner, te bacite u smeće.

2

Wipe dishes, pots, pans and cooking equipment before rinsing and washing.

Obrišite posuđe, lonce, tave i pribor za kuhanje prije ispiranja ili pranja

3

Put food waste into food compost container or trash.

Odložite otpatke od hrane u kontejner za kompost ili u smeće

4

Keep screens in all drains to catch food waste.

Na svim slivnicima čuvajte mrežice za prikupljanje ostataka hrane.

5

Perform regular sink drain maintenance by pouring one-half cup of baking soda down the drain and one-half cup white vinegar down the drain. Wait 15 minutes, then flush thoroughly with very hot water. Do not use method if a commercial product was recently used to remove the blockage.

Održavajte redovito slivnik tako što ćete u slivnik naliti pola šalice soda bikarbone. Sačekajte 15 minuta, potom dobro isperite jako vrućom vodom. Ne koristite ovaj metod ako je komercijalni proizvod nedavno korišten za odstranjivanje začepljenja.
